DETAILED ACTION

The amendment filed July 21, 2003 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3, 10, and 11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification and drawings do not provide an adequate description of the "small plate" (claim 3), "manual interface" (claim 10), or "automatic interfaces" (claim 11) in such a way as to enable one skilled in the art to make or use the instant invention. More specifically, while Figure 13 shows a "small plate", there is no written description of how this plate cooperates with the angle bracket to allow the profile sections to become clamped to any position of the central core. Also, there is no adequate written description of the manual or automatic interfaces allowing the gripper onto a robot or the like. In other words, what differences exist between the "manual" and "automatic" interfaces?

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Blatt (U.S. Patent # 4,957,318).

Blatt ('318) shows a gripper comprising a central profile section core (26), profile sections (22) affixed perpendicularly to the central core (see Fig. 2), longitudinally extending supports (16) mounted at the ends of each profile section through a ball and socket assembly (18,20), and air chokes (10). In regard to claim 4, the position of each support (16) is adjustable along the longitudinal axis of the central core.

Allowable Subject Matter

4. Claims 5, 6, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claim 12 is allowed.

Drawings

6. Corrected drawings were received on Jul7 21, 2003. These drawings are **not** approved for the following reasons: the original specification contains several references to Figure numbers (see pages 4-6) that do not correspond to the newly

renumbered Figure numbers as proposed in the drawing correction. Applicant must either amend the specification to accurately correspond to these renumbered figures or provide corrected drawings that correspond to the original specification.

Priority

7. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
